Foreword

The year 1962 represents the 86th Anniversary of Rogers Brothers Company as a wholesale breeder, grower and distributor of vegetable seeds. Since our beginning in 1876 vast changes have occurred in the seed industry in which we have so long played a part. Nevertheless during the entire life of our firm our goal has always been to maintain a code of ethics, standards of quality and a progressive approach toward the problems of our trade that might best serve their interests and ours.

The degree to which we have attained our goals can best be measured by the ever increasing volume of distribution that our products enjoy, both at home and abroad. We are humbly grateful for this expression of continued confidence that our customers have shown toward our supply, and we will work with undiminished effort to merit such confidence in the future.

As an "Extra Service" it has been our aim to develop and distribute to our customers new varieties and types of peas, beans and sweet corn that are bred to meet the specific current needs of each segment of our trade. Your enthusiastic acceptance of our new introductions gives us encouragement to continue this progressive and costly developmental program into the future.

ROGERS

Hall of Fame

On the facing page you will find listed those pea and bean varieties and sweet corn hybrids that we have elected to Rogers Hall of Fame. To be so classified these items must have been developed by our own plant breeding staff and must currently be enjoying a good acceptance by our trade.

Each year new varieties are released from our breeding stations and in future years some of them will attain sufficient prominence to merit election to our Hall of Fame.

Vine 29 inch, dark, medium heavy

Pod 3½ inch, dark, blunt, double

Seed large sized, dark green, wrinkled

Wilt Resistant—ALL AMERICA BRONZE MEDAL.

A high yielding, excellent quality, mid-season variety, ideally suited for home freezing. See cut page 13.

Dr. M. E. Anderson making single plant selection

Our Twin Falls, Idaho, Warehouse

BEANS—BUSH GREEN POD

BOUNTIFUL

51 Days

Pods are 7 inches long, straight, broad, flat, light green. Seed straw color.

Stringless.

GARDEN & CANNING VARIETY

BOUNTIFUL CANNER (Rogers)

53 Days

Growth habit very similar to regular Bountiful, but gives a higher yield. Fibre analysis is very much lower, therefore, an ideal bean for French-style pack.

CONTENDER (Buff Valentine)

55 Days

Pods are 6½ inches long, slim, near round, dark green and stringless. Seed, buff, lightly mottled. Mosaic Resistant.

MARKET GARDEN & SHIPPING

FULL MEASURE, IMPROVED (Rogers)

60 Days

Pods are 6 inches long, fairly straight, round, dark green. Stringless. Seeds: Reddish brown, mottled with buff.

GARDEN & CANNING VARIETY

FULLGREEN (Developed by U.S.D.A.)

54 Days

Pods 5½ inches long, dark green, round, stringless. Mosaic Resistant and tolerant to several other diseases. Seeds: Mouse grey to olive brown.

GARDEN & CANNING VARIETY

GIANT STRINGLESS

56 Days

Pods are 6 inches long, round, fairly straight, light green. Stringless. Seed: Yellowish brown.

GARDEN & CANNING VARIETY

BEANS—BUSH GREEN POD

New Introduction

EARLIGREEN

A new white seeded slim podded bean developed to meet the whole-bean processors' need for an early, prolific variety adapted for mechanical harvest.

EARLIGREEN (Rogers)

57 Days

Pods are 5½ inches long, smooth, round, straight and slightly lighter color than Tendergreen. Bush erect, 14 inches, dark green, compact with Refugee type leaves. MOSAIC RESISTANT. Seed: SMALL WHITE.

CANNING VARIETY

BEANS—BUSH GREEN POD

New Introduction

HIGRADE, IMPROVED

High yield of plump, fleshy pods
with low fiber for French-Style pack.

HIGRADE, IMPROVED (Rogers)

60 Days

Pods are 6 inches long, plump and fleshy, straight, round, smooth, stringless, medium dark green color and low in fiber. Upright bush well adapted to mechanical harvest. A high yielding white seeded Tendergreen type of fine quality recommended for large size cuts and French-style packs. Mosaic Resistant.

BEANS—BUSH GREEN POD

LANDRETH STRINGLESS (Burpees)

54 Days

Pods are 6 to 7 inches long, fairly straight, round, dark green. Stringless. Seed: Light coffee brown.

GARDEN & CANNING VARIETY

RESISTANT ASGROW VALENTINE

55 Days

Pods are 6 inches long, narrow, oval, dark green, good quality, stringless, seed black.

Basically this bean is in all ways similar to the Stringless Black Valentine long used by the shipping trade with the added advantage of being Mosaic Resistant.

GOOD SHIPPER

RUBY DWARF HORTICULTURAL

56 Days

Pods 4 to 5 inches, broad, flat, dark green, streaked with red. Stringless. Seed: Cream splashed with red.

GARDEN VARIETY

Seed Processing and Storage Plant, Idaho Falls, Idaho.

BEANS—BUSH GREEN POD

SEMINOLE

62 Days

Pods 6 inches long, round, straight, smooth, dark green, and stringless. Developed at Everglades Experiment Station of the University of Florida. Claimed resistant to common mosaic, rust and mildew. Seed: Brown mottled.

GARDEN & CANNING VARIETY

SLENDERGREEN

SLENDERGREEN (Rogers)

56 Days

An excellent bush bean with pods 6 inches long, round, straight, slim and dark green. Stringless, Uniform maturity. Seed: Purple splashed with buff. Similar to Tendergreen in color with slimmer, smoother pod.

GARDEN & CANNING VARIETY

BEANS—BUSH GREEN POD

New Introduction

SLENDERWHITE

Excellent yield of slim, smooth pods of good uniform green color.

SLENDERWHITE

56 Days

Pods are 5-6 inches long, slim straight, smooth, round, stringless and of medium dark green color, well adapted to mechanical harvesting. Pure white seeds. Mosaic resistant. This new variety offers a very high yield of excellent quality beans.

CANNING & FREEZING VARIETY

BEANS—BUSH GREEN POD

New Introduction

SLIMGREEN

SLIMGREEN

61 Days

Pods 5½-6 inches, straight, slim, smooth, round, medium dark green color, stringless. (Slightly darker than Tenderwhite.) Adaptation for mechanical harvesting and concentration of pod set make this bean one of the heaviest yielding of white seeded beans. Mosaic resistant.

STRINGLESS BLACK VALENTINE

55 Days

Pods are 6 inches long, narrow, oval, dark green, good quality, stringless. Seed: Black.

GOOD SHIPPER

BEANS—BUSH GEEN POD

IMPROVED SUPERGREEN (Rogers)

58 Days

This new strain of Supergreen retains the heavy pod set of our original release, but now has the advantage of being MOSAIC RESISTANT. Pods are 6 to 7 inches long, slim, smooth, round, dark green and stringless. Seed: Brownish purple, mottled faun.

GARDEN, CANNING & FREEZING VARIETY

TENDERCROP

Produces high yield of dark green
pods of fine quality

TENDERCROP

55 Days

A new U.S.D.A. variety with pods $5\frac{1}{2}$ inches long, slender, round to slightly creaseback, dark green, slow seed development. Good yielder of fine quality beans carried on a vigorous, upright bush well adapted to mechanical harvesting. Seeds purple mottled. Resistant to Common Bean Mosaic, New York 15 Mosaic and Pod mottle virus.

GARDEN, CANNING & FREEZING VARIETY

BEANS—BUSH GREEN POD

TENDERGREEN, IMPD. (Rogers)

56 Days

Pods are 6 inches long, round, dark green, straight and stringless. This strain is MOSAIC RESISTANT.

Seed: Brownish purple, mottled fawn.

GARDEN, CANNING & FREEZING VARIETY

TENDERGREEN NO. 32304

A prolific, round podded Tendergreen

TENDERGREEN No. 32304 (Rogers)

57 Days

Pods are 6 inches long, round, dark green, straight, stringless, and MOSAIC RESISTANT. Pod is more perfectly round than Imp. Tendergreen. This strain is preferred for CANNING. Seed: Brownish purple, mottled fawn.

GARDEN, CANNING & FREEZING VARIETY

BEANS—BUSH GREEN POD

New Introduction

TENDERWHITE

Our new white seeded variety in the Tendergreen class

TENDERWHITE (Rogers)

60 Days

This new bean has been bred primarily to meet the processors' demands for a high yielding, uniform color cut bean with low fiber content and adapted to mechanical harvesting. Pods are 5½ to 6 inches long, slender, round, straight, smooth, dark green and stringless. MOSAIC RESISTANT. PURE WHITE SEED.

GARDEN, CANNING & FREEZING VARIETY

BEANS—BUSH GREEN POD

TENNESSEE GREEN POD

52 Days

Pods are 7 inches long, very broad, flat, dark green. Stringy. Very popular in the South. Seed: Broad, flat, dark brown.

GARDEN VARIETY.

TOPCROP

TOPCROP

52 Days

Vine is 15 to 17 inches high. An early maturing variety with concentrated pod set and high yield. Pods are 5½ inches long, stringless, round, dark green. Mosaic Resistant. Seed: Brown with buff mottle.

GARDEN, CANNING & FREEZING VARIETY

Hybridizing peas and beans in our greenhouse is the first step in the development of improved varieties.

BEANS—BUSH GREEN POD

New Introduction

WADEX

An attractive new bean with a prolific set of dark green pods of excellent quality.

WADEX (Rogers)

60 Days

A new variety similar to Wade's Bush but higher in yield, earlier in season and more uniform in pod setting. Pods are 6 inches long, straight and dark glossy green. Slightly slimmer and rounder than Wade's Bush. MOSAIC RESISTANT. Seed: Purple-brown.

GARDEN, CANNING & FREEZING VARIETY

Germination Laboratory at Our New Pea and Bean Research Center in Twin Falls, Idaho.

BEANS—BUSH WAX POD

BRITTLE WAX (Round Pod Kidney)

62 Days

Pods are 6 inches long, very slightly curved, round, yellow, stringless. Seed: White with black eye.

GARDEN & CANNING

CHEROKEE WAX

58 Days

Pods 6 inches long, flat to oval, deep yellow, stringless. An improved type of Sure Crop Black Wax with narrower pod. Seed: Black. GARDEN VARIETY.

New installation of Electronic Sorting Machines in our Twin Falls Warehouse.

BEANS—BUSH WAX POD

New Introduction

EARLIWAX

Our newest early wax bean with
slim, golden yellow pods.

EARLIWAX (Rogers)

56 Days

Pods 5-6 inches long, slim, round, very golden yellow color, stringless. An excellent quality bean that develops its color in the smaller sieve sizes. Prolific yielder. Pure white seeds. Mosaic Resistant. Combines the best characteristics of both Puregold and Kinghorn Wax into a new variety.

GARDEN, CANNING & FREEZING VARIETY

BEANS—BUSH WAX POD

KINGHORN WAX

KINGHORN WAX (White Seed)

56 Days

Pods 6 inches long, slightly curved, round, yellow, stringless. Seed: Pure White. An improved higher yielding Brittle Wax type.

GARDEN, CANNING & FREEZING VARIETY

PENCIL POD BLACK WAX

65 Days

Pods are 5½ to 6 inches long, round, slightly curved, yellow, stringless. Seed: Black. GARDEN VARIETY

BEANS—BUSH WAX POD

PUREGOLD WAX

Mosaic Resistant. Deep Yellow

ALL AMERICA BRONZE MEDAL AWARD

PUREGOLD WAX (Rogers)

65 Days

Pods are 5½ to 6 inches long, slim, round, very golden yellow, stringless. Seed: White with light brown around the eye. Mosaic Resistant. A very prolific wax bean of highest quality.

GARDEN, CANNING & FREEZING VARIETY

NEW TOP NOTCH GOLDEN WAX

51 Days

Pods are 5 inches long, flat, straight, yellow, stringless. Seed: White with brown eye. This new strain has virtually eliminated the "hard seed" problem traditionally associated with Top Notch. Season is one day later than former strain, but has heavier yield and better bush. (Use for Improved Golden Wax.)

GARDEN VARIETY

BEANS—POLE

BLUE LAKES, BLACK SEEDED (Rogers) 65 Days

Vine 5 foot, dark green. Pods 7 inches, straight, round, stringless. Resistant to Common Bean Mosaic.

Seed: Black GARDEN & CANNING VARIETY

BLUE LAKES, WHITE SEEDED No. 228 59 Days

Pods $6\frac{3}{4}$ inches long, nearly round, dark, fleshy and stringless at all stages. Vigorous, productive plant resistant to common bean mosaic and certain strains of rust. This strain developed by Asgrow.

Seeds: Small, white. CANNING & FREEZING

BLUE LAKES, WHITE SEEDED F.M. 1 57 Days

An early maturing variety with pods $5\frac{1}{2}$ -.6 inches long, straight, nearly round, uniformly dark green in color, smooth, fleshy, and stringless at all stages. A vigorous growing, good climbing plant with minimum of basal foliage. Highly productive with an extended picking period. Developed by Ferry-Morse Seed Co.

Seeds: Small, white. CANNING & FREEZING

KENTUCKY WONDER (Old Homestead) 65 Days

Vines 5 foot, vigorous. Pods $7\frac{1}{2}$ inches, round, curved, silver green. Stringless when young. Seed:

Light brown, flat oval. GARDEN VARIETY

ST. LOUIS PERFECTION 62 Days

Vine 5 foot, large, medium green, open leaves. Pods 8 inches, straight, round, fleshy, silvery green. Stringless in the young stages. Seed: White, very plump. Sometimes called White Kentucky Wonder.

GARDEN VARIETY

BEANS—BUSH LIMA

FORDHOOK 242 BUSH

70 Days

A top ranking All-American vegetable. Similar to Regular Fordhook but pods are shorter and uniformly curved. Most pods contain four seeds that shelled are identical to regular Fordhook. 242 has outstanding ability to set under adverse conditions, particularly in high temperatures. Excellent quality. Recommended for freezing. Seed: Creamish green and light green.

Bagging a tassel for inbreeding at our hybrid sweet corn research station at Caldwell, Idaho.

Our Sweet Corn Breeding and Trial Grounds at Caldwell, Idaho
Is One of the Largest Programs of Its Kind in the Nation.

SWEET CORN

BURBANK BANTAM

88 Days

Ears 8 inches, with 12 to 14 rows of deep, yellow kernels. Equal in flavor to 8 row Bantam. Stalks 5½ to 6 feet. Produces well under adverse conditions. Among the best of the open pollinated varieties for garden and market.

CARMELCROSS (Hybrid)

75 Days

Ears 7½ to 8 inches, 12-16 rows broad, medium depth yellow kernels. Stalks 5 to 5½ feet. An early midseason, widely adapted hybrid giving a high yield of good quality corn for market, garden and for early canning and freezing. Originally released by the Connecticut Experiment Station.

COUNTRY GENTLEMAN ILL. NO. 13

COUNTRY GENTLEMAN ILL. No. 13 (Hybrid) 95 Days

Ears 8½ inches with narrow, deep, white kernels. Stalk 8 feet. Has white interior silk and excellent holding qualities. A high yielding, top quality Country Gentleman Hybrid developed by Prof. W. A. Huelsen at the University of Illinois.

SWEET CORN

COUNTRY GENTLEMAN

95 Days

Ears, 7 to 8 inches. Deep, white, slender, kernels with no row formation. Tender, sweet, excellent flavor. Small cob. Flag leaves. Stalk 6½ to 7½ feet. Used primarily for home gardening.

New Introduction

DOMINATOR

DOMINATOR (Hybrid)

88 Days

A new yellow hybrid developed in our Sweet Corn Research Program for the canning and freezing trade.

Stalk 6-6½ feet, 1 to 2 tillers, well adapted to mechanical harvest. Ears 8½ to 9 inches with mostly 14 to 16 rows of bright yellow kernels of medium width and depth. Very tender pericarp and excellent flavor.

Dominator equals Golden Cross Bantam in quality and his advantages of white inner silks, increased field yield and higher recovery of cut corn.

SWEET CORN

New Introduction

EARLY COGENT

EARLY COGENT (Rogers)

93 Days

A new Country Gentleman Hybrid developed in our breeding program, maturing two days earlier than Ill. No. 13 with the advantages of better husk length and heavier field yielding ability.

Ears are $8\frac{1}{2}$ to 9 inches long with white inner silk color and with deep, refined white kernels of good quality. Stalk 8 feet tall.

SWEET CORN

GOLDEN BANTAM 8 ROWED

87 Days

Ears 6 to 8 inches with 8 rows of kernels. Usually produces two ears per stalk. Stalks 5½ to 6 feet. An excellent selected strain. Hardy and well known, variety for home garden.

GOLDEN BEAUTY

1955 ALL AMERICA SILVER MEDAL WINNER

GOLDEN BEAUTY (Hybrid)

72 Days

An early, yellow market and home garden hybrid introduced by Prof. W. H. Lachman of the University of Massachusetts.

Stalks 5 feet. Ears 7-8 inches long and slightly tapered, with 12-14 rows of medium width, good yellow, kernels. This hybrid yields well and has good quality factors. Maturity is approximately a day earlier than Marcross.

SWEET CORN

GOLDEN CROSS BANTAM

GOLDEN CROSS BANTAM (Hybrid)

88 Days

Ears 8 to 8½ inches with 12 to 14 rows of golden kernels. Sweet and tender. Heavy yielder, resistant to wilt. Very uniform. Stalk 6 to 6½ feet. A hardy top quality corn. Very wide range of adaptability. Used for garden, market, canning and freezing. Developed by Glenn M. Smith of Purdue University and the U.S.D.A.

SWEET CORN

GOLDEN EARLIPAK

GOLDEN EARLIPAK

73 Days

Developed in our breeding program for first early canning and freezing use, but equally suited for market planting. Especially adapted to areas where short growing season precludes use of slower maturing hybrids.

Stalk 6-6½ feet. Ears 8½ inches, predominantly 12 rows and with tender and sweet kernels of medium depth and good yellow color. A good yielding early hybrid adapted for mechanical harvesting.

De-tasseling Crew in Hybrid Sweet Corn Production Field
at Caldwell, Idaho

SWEET CORN

New Introduction

GOLDEN HYBRID G101

GOLDEN HYBRID G101

74 Days

This new hybrid maturing in Marcross season offers a combination of high yield and improved flavor and tenderness seldom found in an early corn.

Stalks 6 feet, sturdy and with few tillers. Good tolerance to bacterial wilt. Ears $7\frac{1}{2}$ -8 inches, mostly 12 rows and with long husk cover of medium green color. Attractive husked ear appearance. Kernels have good uniformity, glossy yellow color, medium width and depth.

Normally will produce two good ears per plant. Adapted for use as an early home garden, market, canning and freezing corn.

SWEET CORN

New Introduction

GOLDEN HYBRID R-8

GOLDEN HYBRID R-8

87 Days

Demonstrated resistance to *Helminthosporium turcicum* and tolerance to ear worms make this new Rogers hybrid especially suitable for the South. Very good husked-ear appearance combines with dark green husks and flag leaves for market usage.

Stalk 6-7 feet, ears 8½-9 inches, 14-18 rows, kernels medium yellow and with high gloss. White inner silk.

SWEET CORN

GOLDEN NUGGET

GOLDEN NUGGET (Hybrid)

88 Days

A Rogers introduction for the canning and freezing trade. A high yielding midseason, yellow hybrid of exceptionally good quality.

Stalk $7\frac{1}{2}$ to 8 feet, 1 to 2 tillers, ears borne well up from the ground level for ease of harvesting. Easy snapper. Ears 8 to $8\frac{1}{2}$ inches, cylindrical, 14 to 16 good uniform rows, long husk cover. Kernels medium yellow, medium width and depth, very tender and sweet.

IOANA (Hybrid)

89 Days

Ears $8\frac{1}{2}$ inches, very uniform, cylindrical, with 12-14 straight rows of medium width, light yellow kernels of excellent quality. Sturdy $7-7\frac{1}{2}$ foot stalk with few tillers. A high yielding hybrid for canning and market gardening. Developed and released by Dr. E. S. Haber of Iowa State College.

SWEET CORN

IOCHIEF

IOCHIEF (Hybrid) 90 Days
Stalk 7 to 7½ feet, virtually tillerless. Ears 8½ to 9 inches long and filled to tips with deep, narrow kernels of glossy yellow color. Good mechanical harvester. Performs well under drought conditions. For canning, freezing and garden use.

MARCROSS C 13x6 (Hybrid) 73 Days
Ears 7 to 7½ inches with 10 to 14 rows of rather large, yellow kernels. Fairly good quality. Stalks 5 to 5½ feet. An early garden and market corn well known in all corn growing areas. A prolific producer. Introduced by the Connecticut Agricultural Experiment Station.

SWEET CORN

New Introduction

JUBILEE

JUBILEE (Hybrid 2214)

85 Days

This new early-midseason maturing product of our sweet corn breeding program produces a high yield of corn with deep, narrow, yellow kernels of very good quality for canning and freezing usage.

Stalks 7-7½ feet, 1 to 2 tillers per plant, ears up well on stalk. Ears 8½-9 inches, 18-20 rows of kernels. Good cut corn recovery. White inner silk.

SWEET CORN

New Introduction

MELLO-GOLD, WHITE SILK

MELLO-GOLD, WHITE SILK (Hybrid)

82 Days

This new hybrid offers improvement over our original Mello-Gold in that it has better husk cover, white inner silk, longer ear, higher row number and slightly deeper kernels. Desirable factors of quality, early maturity, high yield and glossy yellow kernels have been retained.

Very sturdy 6-6½ foot stalks with very few tillers make this hybrid well adapted to mechanical harvesting.

Ears 8½-9 inches long with 14-16 rows of medium-narrow kernels of good depth. Recommended for both processing and market.

SWEET CORN

NARROWGRAIN EVERGREEN ILL. 14x11 (Hybrid)

93 Days

Ears 8 inches with 18 to 22 rows of deep, slender, white kernels of fine quality. A few flag leaves. Stalk 8 feet. Good yield. Produces a more refined kernel than 14 x 13. Originated by Prof. W. A. Huelsen at the University of Illinois. A garden and canning hybrid.

NARROWGRAIN EVERGREEN ILL. 14x13 (Hybrid)

93 Days

Ears 8 inches with 16-20 rows of very deep, medium width, white kernels. A good quality Narrowgrain. Few flag leaves. Stalk 8 feet, well rooted. A high yielding canning hybrid. Originated by Prof. W. A. Huelsen at the University of Illinois.

SILVER QUEEN (Rogers)

92 Days

Developed in our research program to answer the demand for a truly high quality, white market corn. Stalks 7 to 8 feet, dark green husk and flag. High yield of cylindrical ears 8 to 9 inches long and of proper size to make a 5 dozen per crate pack. 14 to 16 straight rows of snow white kernels, well rounded over the ear tip, sugary-sweet and extremely tender. Tolerant to *Helminthosporium turcicum*.

GARDEN & MARKET VARIETY

SPANCROSS (Hybrid)

69 Days

Ears medium 6 to 7 inches with about 12 rows of yellow kernels. Uniform in maturity and good quality. Stalk 4½ to 5 feet, stocky, ears set low. Extra early, wilt resistant and somewhat resistant to cold. A first-early garden hybrid originated and released by the Connecticut Agricultural Experiment Station.

STOWELLS EVERGREEN

95 to 100 Days

Ears 8 to 9 inches, 16 rows of deep, white kernels. Stalk 8 to 8½ feet with very few suckers. Bred from selected, hardy strains. A high yielding, large eared Stowells for market and gardening.

STOWELLS EVERGREEN (Hybrid)

95 Days

Ears 8½ inches with 16 to 20 rows of medium width, white kernels. Stalk 8 feet with very few tillers. Good quality. Narrower kernels, more uniform in plant type and maturity than open pollinated Stowells Evergreen.

SWEET CORN

New Introduction

WINTERGARDEN

WINTERGARDEN

92 Days

Attractive ear appearance combined with resistance to *Helminthosporium tersicum* have made this new hybrid very popular as a shipping variety in the South. Ears are 9 inches long with 16 to 20 rows of attractive yellow kernels. Stalks 6-7 feet tall.
